

~~~ Socialism ~~~

There are hundreds of slightly different types of socialism, just as there are hundreds of different types of religion. Socialism is a kind of religion, which is why it so often splinters into different branches. It is “faith” based. It is also childishly silly, and when I say childish, imagine a child of ten, dreaming up a wonderful world, where everyone shares everything. That’s the silly idea of socialism which lured hundreds of millions to their deaths. It may be childish, but it is your worst nightmare.

By contrast there is only one kind of capitalism, and that’s capitalism. It is defined as follows:

Capitalism

an economic and political system in which a country's trade and industry are controlled by private owners for profit, rather than by the state.

Socialists have tried to spray graffiti on capitalism, coming up with fake versions, like “State Capitalism” where the State is in charge of capitalism. That’s just more nonsense from childish socialists, who are very good at lying, cheating, and creating misinformation.
